

**IN THE CLAIMS**

Cancel claim 1.

1        2.    [Original]        A method for selectively displaying a  
2        plurality of rooms, comprising the steps of:

3                displaying content material in a page of said room;

4                displaying page associated material in a side bar of  
5                said room;

6                responsive to entering a room, moving said associated  
7                material descriptive into said side bar from a first  
8                direction; and

9                responsive to leaving said room, moving said associated  
10               material from said side bar in a direction different  
11               from said first direction.

Cancel claims 3-7.

1        8.    [New]        A method for displaying rooms from a

2 hierarchy of rooms, each room including a page display and a  
3 corresponding side bar display, comprising:

4 removing side bar material corresponding to a first  
5 page display from said side bar in a first direction  
6 when leaving a first room in said hierarchy of rooms  
7 and inserting side bar material corresponding to a  
8 second page display into said side bar in said first  
9 direction when entering a second room higher in said  
10 hierarchy of rooms; and

11 removing side bar material corresponding to said first  
12 page display from said side bar in a second direction  
13 when leaving said first room in said hierarchy of rooms  
14 and inserting side bar material corresponding to a  
15 third page display into said side bar in said second  
16 direction when entering a third room lower in said  
17 hierarchy of rooms;

18 thereby providing in said side bar a visual impression of  
19 respectively moving up or down said hierarchy of rooms.

1 9. [New] A program storage device readable by a  
2 machine, tangibly embodying a program of instructions

3       executable by a machine to perform operations for displaying  
4       rooms from a hierarchy of rooms, each room including a page  
5       display and a corresponding side bar display, said  
6       operations comprising:

7           removing side bar material corresponding to a first  
8           page display from said side bar in a first direction  
9           when leaving a first room in said hierarchy of rooms  
10          and inserting side bar material corresponding to a  
11          second page display into said side bar in said first  
12          direction when entering a second room higher in said  
13          hierarchy of rooms; and

14          removing side bar material corresponding to said first  
15          page display from said side bar in a second direction  
16          when leaving said first room in said hierarchy of rooms  
17          and inserting side bar material corresponding to a  
18          third page display into said side bar in said second  
19          direction when entering a third room lower in said  
20          hierarchy of rooms;

21       thereby providing in said side bar a visual impression of  
22       respectively moving up or down said hierarchy of rooms.

1        10.   [New]        A program storage device readable by a  
2        machine, tangibly embodying a program of instructions  
3        executable by a machine to perform operations for displaying  
4        rooms from a hierarchy of rooms, each room including a page  
5        display and a corresponding side bar display, said  
6        operations comprising:

7                associating with each room in said hierarchy of rooms a  
8                respective access control list identifying users  
9                authorized to view said room;

10               displaying in said side bar of a parent room material  
11               selectively descriptive of child rooms only to which  
12               said user is authorized by access control lists for  
13               said child rooms;

14               removing side bar material corresponding to a first  
15               page display from said side bar in a first direction  
16               when leaving a first room in said hierarchy of rooms  
17               and inserting side bar material corresponding to a  
18               second page display into said side bar in said first  
19               direction when entering a second room higher in said  
20               hierarchy of rooms; and

21 removing side bar material corresponding to said first  
22 page display from said side bar in a second direction  
23 when leaving said first room in said hierarchy of rooms  
24 and inserting side bar material corresponding to a  
25 third page display into said side bar in said second  
26 direction when entering a third room lower in said  
27 hierarchy of rooms;

28 thereby providing in said side bar a visual impression of  
29 respectively moving up or down said hierarchy of rooms.
